Do You Find Fault With Everybody?

An irritable, fault-finding disposition is often due to a disordered stomach. A man with good digestion is nearly always good natured. A great many have been permanently benefited by Chamberlain's Tablets after years of suffering. These tablets strengthen the stomach and enable it to perform its functions naturally. Obtainable everywhere.—Adv.

Cheap Generosity.
Old Skinner thinks he's generous with his young and handsome wife, yet there is one great drawback to her joys of married life. He supplied her with a beautiful little book of checks in blank; but, alas! he quite forgot to put any money in the bank.

Do you know how to sell goods? Your clerks, of course, know how to sell goods when people call and ask for them. But when people do not call and ask for what they want and what you have in stock, what then? Let the people know what you have. GOOD SECTIONAL WIRE FENCE

Easily Erected, and Will Add Much to the Appearance of Any Property.

A recently invented sectional fence designed for quick and easy erection is composed of U-shaped units, each of which is made from a single piece of wire, the ends of the wire being driven into the ground in such a way that the units overlap and are secure.

Fence Made Up of U-Shaped Wire Sections, Designed for Quick and Easy Erection.

is bound together. One leg of each of the units is bent to form two loops, one located near the top of the fence and the other at the ground line. In erecting the fence the sections are driven into the ground successively, the straight leg of each section being first passed through the loops of the adjacent section.—Popular Mechanics.

MAKE BACK YARD ATTRACTIVE

Cost Need Not Be Great if a Little Care Is Given to Proper Expenditure.

Why not make the back yard just as attractive, or even more attractive, than is the front lawn? It can easily be done and at very small expense. Instead of piles of rubbish, an unsightly ash barrel or two, a more unsightly garbage receiver, unsightly clothes-line poles, etc., take a little time and spend a little money and make the back yard lawn or garden a place upon which you will like to pass a portion of every day.

First, by an underground garbage receiver, which is sanitary, does not take up space in the yard, keeps away rodents, and is a permanent investment. The cover operates by a simple foot trip, a blessing for the women-folks.

Keep the ash barrels in the cellar or under the piazza, where they may be screened from sight.

Then, instead of the clothesline poles, bare and dirty, build a pergola around them and cover it with climbing vines which will keep green all summer; this will cost only a few dollars, and will add hundreds of dollars worth to the beauty of the back yard.

Then, if you have two or three shade trees there—and if you have not, you had better have some transplanted at once—build around each one a rustic seat; this you can do yourself at the expense of only a pound or two of nails and a few hours of work cutting the sticks which you will need from some nearby grove.

DECORATOR MUST BE ARTIST

is Compelled to Have Wide Knowledge to Practice Profession These Days.

Formerly the decorator or painter merely had to deal with colors and paints, and use them to the best advantage. Nowadays a decorator is compelled to have knowledge of the several branches in rugs, furnishings and draperies, their adaptation, selection and utility, and even the plastering branch of building construction, advising for rough or smooth plaster, relief or stucco work, carpenter or cabinet work, says the Real Estate Magazine. He must make himself familiar with all these things in order to carry out his scheme and produce the effects which he may desire to produce in the respective rooms of the modern house.

The decorating, and, to some extent, the furnishing, has become almost as much a part of his calculation and work as the mere painting. He must make his interiors handsome and inviting. The tenant when negotiating for a first-class house is no longer content with bare, white walls and plain floors. The demand in such cases is for a house that is finished according to the modern idea. Like everything else in building construction, these perplexities are turned over to the architect to solve, but the modern metropolitan owner or manager must take them into his business along with brick, cement and steel.
